

REPRODUCTION AND READINESS FOR PARENTING

HCS3050

1 Credit Course

Course Overview	Students acquire the knowledge and skills necessary for achieving and maintaining reproductive health. Students study basic genetic principles related to reproduction as well as pathologies related to the reproductive system. Students examine the benefits and challenges associated with parenthood and factors to assess readiness for parenting. Students gain an appreciation for practicing a healthy lifestyle as it pertains to the individual, family, peers and community.												
Prerequisite	<i>Please refer to Alberta Education's Provincially Authorized Senior High School Courses and Course Codes Document</i>

UNIT	TITLE												
1	<i>Principles of Reproduction - Genetics</i>												
2	<i>Pathology and Treatment of Conditions of Reproductive Systems</i>												
3	<i>Anatomy and Function of the Female Reproductive System</i>												
4	<i>Anatomy and Function of the Male Reproductive System</i>												
5	<i>Are you Ready to Become a Parent?</i>												
An Important Note About Assessment	A wide range of assessment information is used in the development of a student's final grade. Within Alternative Education, individualized assessments provide specific information regarding student progress and overall performance in the course. Student assessments may vary from student to student to adapt to differences in student needs, learning styles, preferences and paces. The teacher will apply best teaching practices to determine appropriate assessment.
